EVENT HIGHLIGHTS

200+ ATTENDEES

100+ COMPANIES

60+ EXPERT SPEAKERS

DATE & VENUE

3-4 November 2026

Radisson Blu Hotel, London Heathrow
140 Bath Road, Harlington, Hayes UB3 5AW, UK

CO-LOCATED EVENTS

BioFormulate LIVE 2026

BIO OUTSOURCING EUROPE 2026

About the Event

WHO / WHAT / WHY

WHO

For Site Heads, Manufacturing VPs, and Engineering Directorsbased in the UK & Ireland, or global firms investing in the region's capacity.

WHAT

The premier operational gathering for the UK/IE biopharma hub, focusing on MHRA regulatory innovation, digital transformation, and capacity expansion.

WHY

To leverage the UK's unique Point-of-Care framework and Ireland's massive infrastructure growth to build a "Western Launchpad" for global biologics.

WHAT TO EXPECT

200+
Senior Attendees

Meet a concentrated audience of Site Heads, Manufacturing VPs, and Engineering Directors from the UK & Ireland's top biopharma hubs and investment projects.

60+
Expert Speakers

Hear from world-class leaders in regulatory innovation (MHRA), facility design, digital manufacturing, and workforce development for the next generation of biologics.

100+
Companies Represented

A gathering representing major global pharma investors, UK innovators, leading engineering firms, and technology providers building the future of British bioproduction.

KEY THEMES & TOPICS

BIOLOGICS MANUFACTURING UK 2026

- Biologics Manufacturing Strategy
- Next-Gen Upstream Processing
- Downstream Purification Optimisation
- AI & Data Analytics for Process Robustness
- Building Future-Ready Biomanufacturing Capacity
- Supply Chain Resilience and Logistics

FEATURED TESTIMONIAL

"I had the pleasure of collaborating with the IMAPAC team during the Irish leg of the Biologics World event in February 2026. The organisers were exceptionally receptive and helpful, ensuring a seamless experience throughout the planning, exhibition logistics, partnering sessions, and sponsor visibility. Their proactive approach in connecting us with potential partners significantly enhanced our ROI. We are already exploring future opportunities to work with the IMAPAC team."

Terry Gray · Field Marketing Manager · Merck

Agenda at a Glance

DAY 1 | 3 NOVEMBER 2026

Biologics Manufacturing Strategy

NETWORKING BREAK

Optimising CDMO Partnerships and Technical Transfer

Spotlight: ADC Outsourcing Excellence

LUNCH

Next-Gen Upstream Processing

Downstream Purification Optimisation

NETWORKING BREAK

Strategies For Selecting & Managing CDMOs

Industry Roundtables

END OF CONFERENCE DAY 1

Agenda at a Glance

DAY 2 | 4 NOVEMBER 2026
Managing Quality Oversight Across External Manufacturing Networks
NETWORKING BREAK
AI & Data Analytics for Process Robustness
LUNCH
Building Future-Ready Biomanufacturing Capacity
Supply Chain Resilience and Logistics
Panel Discussion - The Future of Biopharma Supply Chains – Building Resilience, Agility & Sustainability
NETWORKING BREAK
Closing Panel Discussion – Future of European Biomanufacturing
END OF CONFERENCE

BIOLOGICS MANUFACTURING UK 2026

Day 1

3 November 2026

08:00 **Registration & Coffee**

08:50

Chairman's Welcome Address

Dr Uwe Gottschalk
Operating Partner, Keensight Capital, France

Biologics Manufacturing Strategy

09:00

Supply Chain Decision Intelligence – Increasing the Volume & Velocity of Decisions

- Leveraging real-time data analytics to improve visibility across end-to-end biologics supply networks
- Using AI-driven forecasting to accelerate decision-making on demand shifts, capacity, and inventory
- Integrating cross-functional data streams to reduce bottlenecks and improve responsiveness
- Enhancing risk detection and scenario planning to support faster, more confident supply chain decisions

Niveth Richard
Supply Chain Decision Intelligence Lead, GSK, UK

09:25

Architecture Control of Lipid Nanoparticles Enabled by Process Analytics

- Size, Morphology control of lipid nanoparticles
- Automated process development platform enabled by inline DLS measurements
- Preserving lipid nanoparticle architecture from development to manufacturing scale

Peter Sagmeister
Co-Founder, BIZON Labs, Austria

Day 1

3 November 2026

09:50

Biologics manufacturing Fit for Future - managing more complex molecules and a diverse product range

- Changing from fewer, larger products to smaller
- Besides reliability and quality increase flexibility in the organization
- Improve installations with limited changes for new or non-standard products
- Use AI and mulitavariant analysis to use the data to have the best impact

Dirk Boehm
Site Head DS Penzberg (VP), Roche, Germany

10:15

Accelerate mAb & ADC developability and LNP workflows with Unchained Labs

- AI-Powered Biologics Characterisation: Leveraging large biophysical datasets to assess protein, antibody and conjugate developability.
- High-Throughput Analytics: Simplifying complex, labour-intensive testing through low-volume biologics analysis and the AI Developability Workcell.
- End-to-End Nanoparticle Development: Supporting nucleic acid payload screening, encapsulation, formulation optimisation and process development.
- Scalable LNP Workflows: Using the Sunny suite to transition seamlessly from early-stage research to GMP-scale production.
- Integrated Analytical Solutions: Ensuring consistency, efficiency and scalability across nanoparticle development workflows

Andre Mueller
Director of Product Management, Unchained Labs, USA

10:40

Networking Break

Optimising CDMO Partnerships and Technical Transfer

11:10

Building Faster, Smarter and More Predictable Technology Transfers with Digital Intelligence

- Building a trusted CMC data foundation as the backbone for faster, more reliable transfers
- Connecting AI, automation and digital tools across the end-to-end technology-transfer process
- Translating digital insights into manufacturing readiness, reduced risk and fewer pre-PPQ runs
- Establishing measurable standards for value tracking, acceleration and continuous improvement
- Scaling a repeatable approach across products, modalities, sites and partnerships

Filippo Ramondelli
Associate Director - TT & Project Management Lead, Takeda, Italy

Day 1

3 November 2026

11:35

Supporting ADC From IND To The Long Term Commercial Supply: A Step Ahead Against The Challenges Of The Bioconjugates

- Serving the Innovators from the candidate selection to the IND, from Phase I to the long term commercial supply
- Driving ADC Success with Flexible & High-Quality Solutions from Preclinical to Commercial
- Highlights on the approach to support early stage program through robust development studies.
- Ensuring right first-time-approved regulatory submission to save time and costs.

Giorgio Salciarini
Head of Sales - Technical Business Development, BSP Pharmaceuticals, Italy

12:00

De-Risking Tech Transfer and Scale-Up of New manufacturing Processes

- Managing successful tech transfer across complex manufacturing processes
- Reducing scale-up risks while maintaining product quality and consistency
- Improving communication and operational alignment between operations and development
- Managing project lifecycle and continuous improvement

Anthony Beaney
Principal Scientist, Lonza Biologics, UK

12:30

Lunch

Next-Gen Upstream Processing: Intensification & Perfusion

13:30

Unlocking Biologics Manufacturing Potential: Case Studies in Data Science Applications

- Applying data science to optimize upstream and downstream process performance and reduce variability
- Using advanced analytics to identify root causes of batch deviations and improve yield consistency
- Leveraging predictive models to enhance process control, scale-up success, and tech transfer efficiency
- Demonstrating real-world case studies where data-driven insights improved cost, quality, and time-to-market

Shyam Panjwani
Senior Principal CMC Data Scientist, Bayer, USA

Day 1

3 November 2026

13:55

Glutenase at Scale: Where Process Development Meets Sustainability

- Scalable Process: Developing a cost-efficient, sustainable manufacturing process for TAK-062.
- Process Optimisation: Targeting resource-intensive steps through innovative technologies.
- Key Improvements: Antibiotic-free fermentation, raw material optimisation, and waste reduction.
- Scale-Up: Integrating yield enhancement and process intensification for commercial production.

Michael Palige
Process Development & CMC Lead, Takeda, Austria

Downstream Purification Optimisation

14:20

Bispecific Purification: Double Trouble or Twice as Nice?

- Tackling complex product-related impurities in bispecific purification
- Impact of molecular design, clone selection and analytics on manufacturability
- Developing robust, scalable purification strategies for next-generation bispecifics
- Industrial case studies and key lessons learned

Gavin Wild
Head of Early Process Sciences, UCB, UK

14:45

Networking Break

Strategies for Selecting & Managing CDMOs

15:00

Partnering for Success: Integrating Internal Expertise with External Manufacturing Capabilities

- CDMO selection process, relationship management
- An example of what can be achieved when both parties are aligned on a shared vision.

Franz Schnetzinger
VP / Head PAD & QC, AAVantgarde Bio, UK

Day 1

3 November 2026

15:25

Managing CDMO Partnerships Across Formulation & Clinical Trial Supply Networks

- Selecting the right CDMO partners for formulation development, manufacturing, and commercial supply.
- Establishing governance models that drive performance, transparency, and long-term collaboration.
- Managing supply chain risks, capacity constraints, and business continuity across external networks.
- Using performance metrics and operational reviews to ensure quality, reliability, and on-time delivery.

Karen O'Hanlon
Chief Operating Officer, StablePharma, UK

15:50

Choosing the Right Outsourcing Partner: From Payload to Fill-Finish

- Strategic partner selection for long-term external manufacturing success
- Building strong governance frameworks across global CDMO partnerships
- Strengthening supply resilience and managing operational risk
- Driving performance oversight from development through commercial supply

Abisola (Abi) Kuforiji
Associate Director-External Manufacturing -Operations lead (EMEA), MSD, Switzerland

16:05

ROUNDTABLE DISCUSSION

1. AI in Supply Chain - Are they dependable for decisions?
   Niveth Richard — Supply Chain Decision Intelligence Lead, GSK, UK
2. Scaling Biologics Manufacturing for Future Demand
   Dirk Boehm — Site Head DS Penzberg (VP), Roche, Germany
3. Maximising Drug Product Manufacturing
   Alexander Hempel — Director Manufacturing, Avethera, Germany
4. Securing Biomanufacturing Supply Chains: Innovative Approaches to Accessing Critical Materials and Consumables (LMICs approach)
   Valerie Chambard-Benalleg — Manufacturing Supply Chain Lead, CEPI, UK
5. The Outsourcing Paradox: Preserving bandwidth without losing scientific expertise and strategic control.
   Julia Hinteramskogler — Head of Technical Development, Elaris, Austria
6. Building High-Trust Sponsor-CDMO Relationships
   Franz Schnetzinger — VP / Head PAD & QC, AAVantgarde Bio, UK
7. Formulation as a Commercial Differentiator
   Marco Carfagna — Head of Formulation Development & Drug Product Labs, Formycon, Germany

17:20 **Key Takeaways**

17:05 **Cocktail Reception**

18:00 **END OF CONFERENCE DAY 1**

BIOLOGICS MANUFACTURING UK 2026

Day 2

4 November 2026

08:00 **Registration & Coffee**

08:50

Chairman's Welcome Address

Dr Uwe Gottschalk
Operating Partner, Keensight Capital, France

Managing Quality Oversight Across External Manufacturing Network

09:00

Building Robust Quality Governance Across Global CDMO Networks

- Establishing effective quality governance frameworks across global CDMO networks
- Strengthening sponsor–CDMO collaboration through clear accountability, communication, and oversight
- Implementing risk-based approaches to supplier management, audits, and quality performance monitoring
- Maintaining inspection readiness and consistent GMP compliance across outsourced manufacturing operations

Marcelo Castro
Senior Director, Global Biopharma External Supply Operations Quality, Pfizer, Ireland

09:25

Enhancing Visibility and Control in External Manufacturing Quality Systems

- Strengthening quality oversight across complex external manufacturing networks
- Improving real-time visibility and risk management within supplier quality systems
- Aligning sponsor–CDMO quality expectations and governance frameworks
- Leveraging digital tools and data analytics to enhance compliance and operational control

Cathal Gallagher
Senior Director-Head of Quality, External Operations EU, Takeda, Ireland

Day 2

4 November 2026

09:50

Speed to Clinic: Tech Transfer and Phase I Manufacturing in Under 6 Months

Dr Ashwinkumar V Meru
Head of Global Business Development, Kemwell, India

10:15

Strengthening Quality Oversight Across External Manufacturing Networks

- Standardising GMP and quality systems across CDMO partners for consistent compliance
- Using digital QMS tools for real-time deviation tracking and faster resolution
- Strengthening risk-based audits and supplier qualification across sites
- Driving continuous improvement through CAPA and shared quality KPIs

Jose Martinez Calderon
QA R&D and Commercial Product Development Senior Director, Almirall, Spain

10:40

Networking Break

AI & Data Analytics for Process Robustness

11:10

From Data Rich To Decision Intelligent

- Establishing effective governance frameworks for AI and data across manufacturing and supply chain functions
- Aligning AI and data strategies with business priorities, operational needs and measurable outcomes
- Balancing data quality, accessibility, security and compliance to enable trusted AI adoption
- Moving from individual AI use cases to scalable, cross-functional digital transformation and value creation

Syed Saqib Naqvi
Senior Manager, Digital Excellence, Amicus Therapeutics, UK

11:35

Single Cell Analysis for Enhanced Characterisation

- Leveraging single-cell analysis for deeper product and process characterisation
- Identifying cell-to-cell variability and critical subpopulations
- Linking cellular attributes to productivity and product quality
- Supporting better clone selection and process optimisation

Dr Aurelien Bunga
Senior Scientist, Rinri Therapeutics, UK

Day 2

4 November 2026

12:00

Beyond the Straight Line: Kinetic Modelling for Faster, Defensible Stability Decisions

- How advanced kinetic modelling (AKM) predicts long-term stability and shelf life from accelerated and stress data - reducing the real-time data needed to support a claim from years to months
- Applying one modelling framework across the decisions biomanufacturers actually face: shelf-life determination, temperature-excursion assessment, and internal release limit setting
- Quantifying uncertainty explicitly through prediction bands, rather than assuming it - producing outputs that stand up to regulatory scrutiny
- Why AKM aligns with the direction of the evolving ICH Q1 guidance on model-informed stability strategies.

Dr Warren Roche
Senior Biostatistician Expert, Argenx, Belgium

12:25

Lunch

Building Future-Ready Biomanufacturing Capacity

13:30

From Design to Manufacture: Developing CARKey, a New Generation of Programmable CAR-T Therapy

- Programmable CAR-T design for greater precision and flexibility
- Translating CARKey from design to scalable manufacture
- Optimising CMC, quality and process consistency
- Advancing next-generation CAR-T towards clinical application

Dr John Bridgeman
Chief Scientific Officer, ImmunoKey, UK

13:55

Vaccine manufacturing networks in Low- and Middle-Income Countries

- Strengthening regional vaccine manufacturing capacity and supply resilience in LMICs
- Building sustainable technology transfer and local manufacturing partnerships
- Overcoming infrastructure, workforce, and regulatory challenges across emerging markets
- Enhancing equitable access through scalable and future-ready vaccine manufacturing networks

Vishal Mukund Sonje
Senior Vaccine Manufacturing Lead, CEPI, UK

Supply Chain Resilience and Logistics

14:15

CEPI: An Input Materials Supply Organization for African Vaccine Input Material A Supply Consortium Model: Scope, Governance and Investment

- Aggregating demand for critical vaccine input materials and consumables
- Defining the scope of an African supply consortium model
- Establishing governance structures and stakeholder responsibilities
- Exploring investment needs and long-term sustainability

Valerie Chambard-Benalleg
Manufacturing Supply Chain Lead, CEPI, UK

14:40

Networking Break

14:55

PANEL DISCUSSION

The Future of Biopharma Supply Chains – Building Resilience, Agility & Sustainability

- Resilience in an Increasingly Unpredictable World
- Data, AI & Digitalisation – Creating a More Intelligent Supply Chain
- From Development to Launch – Building Supply Readiness Earlier
- Building the Future Supply Chain – Scalability, Sustainability & Patient Access

MODERATOR

Dr Christopher van der Walle
Head of Formulation Science, MHRA, UK

PANELLISTS

Brendan Noone
Senior Director, Global Supply Chain & Strategy, AstraZeneca, Ireland

Max Corbett
Senior Director, CMC Group Head Biologics and Small Molecule, CSL, Switzerland

Kristin Grande
Senior Manager, Technical Marketing - Life Sciences, Greenfield Global, USA

Shyam Panjwani
Senior Principal CMC Data Scientist, Bayer, USA

Kellen LaVigne
Director, Supply Chain & Logistics, Aurion Biotech, USA

Day 2

4 November 2026

15:40

PANEL DISCUSSION

The Future of European Biomanufacturing: Capabilities, Competitiveness and Innovation

- Biomanufacturing Beyond 2030: Future priorities and preparedness gaps
- Europe's Competitive Edge: Attracting development and manufacturing investment
- Strategic Partnerships: Enabling scale-up while retaining critical in-house expertise
- AI in Biomanufacturing: Opportunities, risks and implementation readiness

MODERATOR

Julia Hinteramskogler
Head of Technical Development, Elaris, Austria

PANELLISTS

Jose Martinez Calderon
QA R&D and Commercial Product Development Senior Director, Almirall, Spain

Michael Palige
Process Development & CMC Lead, Takeda, Austria

Syed Saqib Naqvi
Senior Manager, Digital Excellence, Amicus Therapeutics, UK

Sponsorship Packages

DIAMOND

PACKAGE INCLUDES

- Full-day workshop for 30 pax: room, lunch, 2 refreshment breaks, coffee / tea
- Keynote solo presentation: 20 min + 5 min Q&A
- 25-minute end-user client case study
- 12 sqm exhibition space (4×3m booth + banner)
- 1 speaker pass; 7 guest passes; 2 exhibitor passes
- 10 onsite 1:1 meetings
- Lead retrieval

PLATINUM

PACKAGE INCLUDES

- Half-day workshop for 30 pax: room, 1 refreshment break, coffee / tea
- Prime-billing solo presentation: 20 min + 5 min Q&A
- 25-minute end-user client case study
- 12 sqm exhibition space (4×3m booth + banner)
- 1 speaker pass; 7 guest passes; 2 exhibitor passes
- 10 onsite 1:1 meetings
- Lead retrieval

GOLD

PACKAGE INCLUDES

- Prime-billing solo presentation: 20 min + 5 min Q&A
- 9 sqm exhibition space (3×3m booth + banner)
- 1 speaker pass; 5 guest passes; 2 exhibitor passes
- 10 onsite 1:1 meetings
- Lead retrieval

SILVER (ENHANCED)

PACKAGE INCLUDES

- Solo presentation: 20 min + 5 min Q&A
- 6 sqm exhibition space (3×2m booth + banner)
- 1 speaker pass; 3 guest passes; 2 exhibitor passes
- 5 onsite 1:1 meetings
- Lead retrieval

SILVER

PACKAGE INCLUDES

- Solo presentation: 10 min + 5 min Q&A
- 6 sqm exhibition space (3×2m booth + tabletop display)
- 1 speaker pass; 2 guest passes; 2 exhibitor passes
- 5 onsite 1:1 meetings
- Lead retrieval

BRONZE

PACKAGE INCLUDES

- Solo presentation: 10 min + 5 min Q&A
- 6 sqm exhibition space (3×2m booth)
- 1 speaker pass; 2 guest passes
- Lead retrieval

EXHIBITION + 10 MEETINGS

PACKAGE INCLUDES

- 6 sqm exhibition space (3×2m booth + banner)
- 1 guest pass; 2 exhibition passes
- 10 onsite 1:1 meetings
- Lead retrieval

EXHIBITION + 5 MEETINGS

PACKAGE INCLUDES

- 6 sqm exhibition space (3×2m booth + banner)
- 1 guest pass; 2 exhibition passes
- 5 onsite 1:1 meetings
- Lead retrieval

EXHIBITION

PACKAGE INCLUDES

- 6 sqm exhibition space (3×2m booth + banner)
- 1 guest pass; 2 exhibition passes
- Lead retrieval

Sponsorship Opportunities

BIOLOGICS MANUFACTURING UK 2026

Who Should Sponsor?

- EPCMV Firms
- Bioprocessing Equipment
- Industry 4.0 Providers
- QMS Software
- Process Intensification

Why Sponsor

SPONSORSHIP BENEFITS

- Thought Leadership Speaking
- Panel Participation
- Solution Showcases
- Engagement and Visibility Opportunities
- Branding and Digital Visibility
- Exclusive Networking

TESTIMONIALS

The Biologics and CGT Manufacturing DACH conference 2026 was very well planned and coordinated. It provided high-quality talks for staying up-to-date in our industry and I specifically enjoyed the time for networking.

Dr Heiner Apeler
VP Head of Biologics Development
Bayer
GERMANY

Thanks for the invite to speak at the event. It was a really enjoyable meeting and a great opportunity to present our work to the community. Identifying key partners for ImmunoKey's development plan is a critical aspect of getting our therapies to patients; the CGT and Biologics Manufacturing DACH meeting offered us the opportunity to engage with key CDMOs who can help us achieve this goal.

John Bridgeman
CSO
Immunokey
UK

Just back from an incredible time at the Biologics Manufacturing DACH congress! I have to be honest - as someone in Procurement, some of the deep-dives into Cell & Gene and biologics development were definitely above my scientific capabilities! However, the exchange of knowledge was fantastic, and it was a privilege to learn from such brilliant minds. A true highlight was the fantastic collaboration with Christopher Pawlak (PhD) . I had the privilege of co-hosting a round table with him focused on the impact of tariffs in the biopharma world. Christoph, thank you for the partnership - it was a truly dynamic discussion! 🤝 One of my biggest takeaways is that we have officially entered the era of "The Great Reshoring". We are moving past the days when drug manufacturing decisions were purely scientific; they are now deeply geopolitical. As we discussed in our round table, we can no longer just react to change. We have to treat scenario planning like a muscle that we train constantly to design for volatility. The event really hit home how much our world is changing - from the incredible progress in biologics manufacturing to the AI evolution. I'm excited to see how we can implement these insights to build resilience and benefit BMS biologics manufacturing. Back to my desk, I will start with socializing the learnings with my colleagues. A huge thank you to Drishti G. for the flawless organization and to Noel Murphy for approving the trip and supporting this critical learning opportunity!

Dennis Stelljes
Associate Director, Strategic Sourcing & Procurement, Biologics External Manufacturing

TESTIMONIALS (cont.)

Really well organised conference with great attendees and high engagement - I was delighted to have taken the time to attend and really enjoyed sharing my thoughts on Accelerating Biologics Pipeline and ensuing discussion. Thank you to all organisers and facilitators

Dr Andrew Kelly
Director, Manufacturing Technology
BMS
IRELAND

A fantastic deep dive into the DACH region's CGT landscape. This conference made one thing clear: efficacy is proven, but industrialization is the new frontier. To truly move the needle, we must look beyond the lab and focus on scaling automation, streamlining supply chains, and tackling COGS. The diversity of voices - from large corporations, to tech suppliers and academic pioneers - provided a 360-degree view of the manufacturing challenges we must solve together.

Dr Thomas Villiger
Professor of Bioprocess Technology
University of Applied Sciences and Arts Northwestern Switzerland FHNW
SWITZERLAND

Thanks for the invite. The conference was really excellent, due to the caliber and engagement of the attendees.

Brian O'Connor
VP Global Quality
Orchard Therapeutics

TESTIMONIALS (cont.)

CGT MANUFACTURING DACH 2026 | BIOLOGICS MANUFACTURING DACH 2026

I thoroughly enjoyed attending the CGT Manufacturing DACH 2026 by IMAPAC. The program featured exceptionally industry-relevant talks that provided deep insights into the current landscape. Beyond the sessions, the networking opportunities were top-tier, thanks to the high caliber of participants.

BIOLOGICS MANUFACTURING IRELAND 2026

I had the pleasure of collaborating with the IMAPAC team during the Irish leg of the Biologics World event in February 2026. The organisers were exceptionally receptive and helpful, ensuring a seamless experience throughout the planning, exhibition logistics, partnering sessions, and sponsor visibility. Their proactive approach in connecting us with potential partners significantly enhanced our ROI. We are already exploring future opportunities to work with the IMAPAC team.

Terry Gray
Field Marketing Manager
Merck

BIOLOGICS MANUFACTURING IRELAND 2026

Thank you for your email and organising this wonderful event. It was a pleasure to participate. Congratulations on organising this event. It was a wonderful opportunity to present our work and to collaborate with others in the area. Looking forward to your next event

A VARIETY OF PRODUCTS TO CATER TO GLOBAL BIOPHARMACEUTICAL INDUSTRY'S MARKET INTELLIGENCE AND BUSINESS CONNECTIONS NEEDS.

01 B2B EVENTS

Thought-leadership, industry knowledge-sharing and quality networking are at the core of IMAPAC's B2B events.

Create an engaging experience for your audiences, explore our B2B Events Solutions.

02 360 MARKETING SOLUTIONS

Expand your reach and influence! Be it with customized events, digital marketing solutions, content creation or thought-leadership.

Tap into our global audience spanning the sub-sectors and regions shaping the biopharmaceutical industry.

03 DASHBOARDS

A quick-view analytics tool to power your decisions. Access region or country-specific data to uncover pipeline information, product focus.

Customize the dashboard based on your needs. Drill down to the data you need using custom views.

04 CUSTOM RESEARCH

Based on your objectives and budget, you can customize a package to one that best meets your intelligence needs. This allows you to maximize your ROI without spending on items that are not in line with your strategies.

With access to a database of 60,000+ life science professionals. We conduct research with a highly-qualified audience.

05 REPORTS

Discover in-depth market information of the growing biopharmaceutical sector.

HELPING THE GLOBAL BIOPHARMACEUTICAL INDUSTRY

Generate Tangible Growth

IMAPAC is the one-stop shop of market intelligence and business connections for the global biopharmaceutical industry. We help companies expand their influence, make data driven decisions through our industry intelligence, and link up with other biopharmaceutical professionals to exchange knowledge and engage in quality networking. At the core of IMAPAC is our mission to help biopharmaceutical businesses globally generate tangible growth. At the same time, our heart lies in giving back to society. We empower the next generation by equipping underprivileged children with an education.
